- We accept the following file formats: JPEG, EPS, PDF, or TIFF (jpegs and tiffs only as photos not as ads with text).
- Black and white bitmap mode images, such as scanned logos, should be saved at: 600 dpi.
- Save all full-color photos/graphics or type as CMYK mode, not RGB.
- If you are working with Pantone or spot colors make sure they are also converted to CMYK.

- PDF Requirements: Before submitting a PDF, be sure to check for any graphics or type containing RGB, spot color or JPEG files. We can't make changes to text, colors, check photos or convert a color PDF to a black and white PDF. All changes must be made by the client in the native program used to create file.
- All fonts must have both screen and print versions and be usable on a Mac; no PC fonts.
- When coloring text, try to choose a sans serif or bold font at least 12 points in size.
- Warning: Any images using dpi less than required will not print as desired. For example, images from web sites (72 dpi) are of poor quality and will look blurry/fuzzy and jagged.
